RE: Surety Arrangement for Syntana-Utah Project,
ACT/047/021, Uintah County, Utah

I spoke with Ed Mihelich, Senior Mining Engineer at Quintana Minerals Corporation, on the telephone on June 4, 1985 regarding the reclamation bond estimate. I had requested more detailed information and the references for the estimate. In speaking with Mr. Mihelich, he explained how the bond estimate was developed.

The project will probably not start into the construction phase for 5-12 years. Mr. Mihelich explored the possibility of receiving an approved mine plan, but before construction began, a bond would be posted and a permit issued.

I told him I would check with Sue Linner and we would return with a reply to him about this.
